Preface

International Development Assistance has been an important source of financing for over the last six decades in Nepal. Nepal receives development assistances both from bilateral as well as multilateral development partners. In addition, the Government is also able to track the foreign aid mobilized by the INGOs. The development cooperation in Nepal is mobilized in two ways. One is through the Government budgetary system and another is outside the Government budgetary system. Those projects/programs reflected in the Annual Income and Expenditure Estimates (Red Book) of the Government are on-budget and those projects/programs which are not covered in the national budget are understood as off-budget projects/programs. All off-budget projects/programs are presented in the form of the Statements of Technical and Other Assistance (TA Book). Accordingly, the summary details of those projects/programs not reflected in the national budget, with the support from bi-lateral and multilateral agencies, and INGOs, are presented in this publication. This publication represents the off-budget projects/programs being implemented in the country.

For the last few years, reporting of the volume of development cooperation mobilized through International Non-governmental Organisation (INGOs) has been gradually increasing. For this, IECCD/MoF has been constantly engaged in providing trainings to INGO focal persons for capturing aid related data. To track and disseminate off-budget projects/programs including those mobilized through INGOs is not so simple task. Similarly, reporting of technical assistance is another challenging task. The dissemination of information through this publication is a step forward to ensure transparency in all types of aid coming to Nepal.

The present publication reflects projects/programs related to technical and other assistance which are not covered in the national budget, their major activities, total and annual budget and donor's country including project/program and districts under implementation.

Aid Management Platform (AMP) of the International Economic Cooperation Coordination Division of the Ministry of Finance and the information received from both DPs and sectoral ministries have been used as the primary sources of information related to Technical Assistance. Likewise, for the programs implemented through INGOs, the information received from Social Welfare Council has been used as the primary source. It has been anticipated that this publication will be useful to Government agencies and Development Partners to implement and monitor the off-budget projects/programs, and to all other professionals, economists, researchers, teachers, students, and other individuals interested in foreign aid mobilization in Nepal.
